

BIOGRAPHIES OF CLE PANELISTS

Dr. Eric M. Meslin is Director of the Indiana University Center for Bioethics, Professor of Medicine, and of Medical and Molecular Genetics in the Indiana University School of Medicine, and Professor of Philosophy in the School of Liberal Arts. He is also Assistant Dean for Bioethics at the Indiana University School of Medicine. Dr. Meslin received his B.A. in Philosophy from York University (Toronto), and both his M.A. and Ph.D. from the Bioethics Program in Philosophy at the Kennedy Institute of Ethics, Georgetown University in Washington, D.C.

He came to Indiana University in July 2001 from the U.S. National Bioethics Advisory Commission (NBAC), where he had been Executive Director since 1998. NBAC was appointed by President Bill Clinton in 1995, and was charged with advising the White House and the federal government on a range of bioethics issues including cloning, stem cell research, international clinical trials, and genetics studies. He has authored (or co-authored) more than 80 articles and book chapters, with most focusing on various topics in research ethics and health policy. He has been a consultant to the World Health Organization, the US Observer Mission to UNESCO, the Canadian Institutes of Health Research and is a member of a number of advisory boards including the Board of Directors of the Canadian Stem Cell Network (of which he is also chair of the Ethics Committee).

Paul Lombardo is Professor of Law at Georgia State University's College of Law. As a member of the core faculty at the Center for Law, Health and Society, he teaches course in Genetics and the Law, the History of Bioethics, Mental Health Law and the Legal Regulation of Human Research. Professor Lombardo received his A.B. from Rockhurst College (Kansas City), his M.A. from Loyola University of Chicago and both his Ph.D and J.D. from the University of Virginia.

Professor Lombardo has lectured at dozens of colleges and universities in the U.S. and Canada. He has published extensively on topics in health law, medico-legal history, and bioethics. He is coeditor of Fletcher's Clinical Ethics (3rd ed.). He has a longtime interest in the legal history of the American eugenics movement and his book *The One Sure Cure: Eugenics, the Supreme Court and Buck v. Bell*, will be published by Johns Hopkins University Press.

Peter Marcus, M.D., is an Associate Professor of Obstetrics and Gynecology at the Indiana University School of Medicine. A graduate of Yale University School of Medicine and The Johns Hopkins University, where he received his Masters in the History of Medicine, Dr. Marcus is the clerkship director for the third year course in Obstetrics and Gynecology. One of his many duties is to teach a biomedical ethics course to the third year medical students. During these seminar sessions, the topic of Eugenics and Informed Consent are presented.
